

Stellar Insight Inc. Cedar Retention (ENG-23) Postmortem

1. Background

This postmortem focuses on the core D14 second-creation threshold. Earlier documents recorded it as 34%, which proved unsuitable in practice.

2. Revised conclusion

After confirmation by Summer Chen and Growth Operations, the core D14 second-creation threshold is formally revised from 34% to 32.5%; the current value governs.

Reminder: any 34% appearing in earlier material is void; the current value is 32.5%.

3. Counter-intuitive note

Do not answer with the generic definition of a newly registered user.
