

Stellar Insight Inc. Onyx Keyring (ENS-37) Postmortem

1. Background

This postmortem focuses on the mobile derived-key lifetime. Earlier documents recorded it as 13 days, which proved unsuitable in practice.

2. Revised conclusion

After confirmation by Priya Rao and Security Office, the mobile derived-key lifetime is formally revised from 13 days to 8 days; the current value governs.

Reminder: any 13 days appearing in earlier material is void; the current value is 8 days.

3. Counter-intuitive note

Do not answer with the common 90-day rotation default.
