

Stellar Insight Inc. Quartz Budget (ENF-19) Postmortem

1. Background

This postmortem focuses on the auto-freeze remaining-ratio alarm. Earlier documents recorded it as 12%, which proved unsuitable in practice.

2. Revised conclusion

After confirmation by Helena Ford and Finance Risk, the auto-freeze remaining-ratio alarm is formally revised from 12% to 9%; the current value governs.

Reminder: any 12% appearing in earlier material is void; the current value is 9%.

3. Counter-intuitive note

Do not answer that a larger amount simply means higher-level approval.
